

SHOWER FLOORS

When it comes to choices, FIAT® has an extensive selection of **shower floors**, including a range of materials, sizes, shapes, colors, and ADA compliant options. And all of these are backed with FIAT's history of safety, durability, and reliability.

MATERIAL

There is not a finer and more durable material for shower floors than precast **Terrazzo**. FIAT®'s shower bases, composed of black and white marble chips cast in white Portland cement, have a minimum compression strength of 3,000 psi. They are also easy to maintain and install.

Molded-Stone® or Sheet Molding Compound (SMC) contains a calcium based material that while being low cost, provides weight, strength, and fire retarding properties. The SMC process permits the use of longer glass fibers, which are placed in a multiple overlap of individual strands to permit total impregnation and wetting-out of the fibers without any fiber degradation that can diminish the strength imparting properties. The more thorough bond of the glass fibers reduces the amount of fibers necessary for maximum strength resulting in both lower weight and a denser, smoother, void-free product.

Gelcoat material is made entirely out of fiberglass with a gelcoat surface finish. This gelcoat is a polyester resin on the surface of the fiberglass material. This type of material is affordable and can be repaired easily.

SHAPES AND OPTIONS

**Terrazzo Shower Floors
Single Threshold**

**Terrazzo Shower Floors
Neo-corner**

**Molded-Stone Shower Floors
Single Threshold**

**Molded-Stone Shower Floors
Double Threshold**

**Terrazzo Barrier-Free Shower Floors
with Ramp**

**Terrazzo Shower Floors
No Threshold**

MOLDED STONE COLOR

100 White

TERRAZZO COLORS

081 White Portland Cement with Black and White Chips (*standard color*)

100 White Portland Cement with White Chips (*custom order color*)

501 Grey Portland Cement with White Chips (*custom order color*)

 Meets the Americans with Disabilities Act guidelines and ANSI A117.1 requirements for accessible and usable building facilities. 36" x 36" shower walls must measure 36" x 36" when inspected. Thresholds must be 1/2" or less when inspected. Check local codes.
